

**Sarasota County Comments on ENERGY STAR Program
Requirements for Residential Light Fixtures Draft 1 Eligibility Criteria
– Version 4.0**

The draft appears to provide an energy efficient, reliable, quality product.

I suggest that Table 2A "Outdoor Product Packaging and Special Applications" have the label show the distance for light spread pattern before cut-off. This would allow purchaser to determine if light from the fixture would impact neighbors in the form of light pollution.

Noted typo in Table 2B Outdoor Fixture - Compliance through reduced operating time, controls motion sensor -second bullet "or audibly inform devise operation" should be device. Thanks
